

Executive Summary

The Shreeji Sharan Group of Companies website faces significant usability and trust issues, leading to user drop-offs. Key problems include unclear value propositions, weak navigation, lack of trust signals, and poor CTAs. By addressing these issues, the website can improve user engagement, build credibility, and guide visitors toward conversion.

Key Findings

1. **Weak First Impression**:

- Homepage lacks a compelling hero section and clear value proposition.
- No segmentation for target audiences (families, luxury buyers).

2. **Poor Navigation**:

- No persistent main menu or dedicated "Projects" page.
- Users cannot filter projects by persona or location.

3. **Lack of Trust Signals**:

- No testimonials, certifications, or awards.
- Footer disclaimer ("not an official site") undermines credibility.

4. **Weak CTAs**:

- Generic CTAs ("Read More") lack urgency or action-oriented language.
- No prominent contact options (e.g., floating WhatsApp button).

5. **Content Issues**:

- Blogs lack relevance and categorization.
- Project pages lack detailed information (pricing, floor plans, amenities).

6. **Mobile Usability**:

- Text and images may not scale properly on small screens.
- No mobile menu or optimized forms.

Opportunities

1. **Enhance Homepage**:

- Add a hero banner with compelling visuals and a clear value proposition.
- Segment offerings for target audiences (e.g., "Dream Homes for Families").

2. **Improve Navigation**:

- Implement a sticky header with standard tabs (Home, About, Projects, Blogs, Contact).
- Add persona-based project filters (e.g., "Family-Friendly," "Luxury").

3. **Build Trust**:

- Add testimonials, certifications, and awards.
- Highlight COVID-19 initiative as a dedicated "Social Responsibility" section.

4. **Optimize CTAs**:

- Use benefit-driven CTAs (e.g., "Book a Private Tour," "Get Your Home Loan Approved").
- Add a floating WhatsApp/phone CTA button.

5. **Refine Content**:

- Publish blogs addressing buyer concerns (e.g., "How to Choose a Child-Safe Home").
- Create detailed project pages with pricing, floor plans, and amenities.

6. **Mobile Optimization**:

- Test and optimize for mobile usability.
- Implement a collapsible hamburger menu.

Recommendations

High Priority

1. **Redesign Homepage**:

- Add a hero banner with a tagline, project visuals, and clear CTAs.
- Highlight USPs upfront (e.g., "Futuristic Architecture," "Community-Driven Spaces").

2. **Add Trust Signals**:

- Include testimonials, certifications, and awards.
- Replace disclaimer with positive messaging (e.g., "Official Partner of MCGM").

3. **Improve Navigation**:

- Implement a sticky header with standard tabs.
- Add persona-based project filters.

4. **Optimize CTAs**:

- Use benefit-driven CTAs with urgency (e.g., "Limited Units Left").
- Add a floating WhatsApp/phone CTA button.

Medium Priority

5. **Refine Content**:

- Publish blogs addressing buyer concerns.
- Create detailed project pages with pricing, floor plans, and amenities.

6. **Mobile Optimization**:

- Test and optimize for mobile usability.
- Implement a collapsible hamburger menu.

Low Priority

7. **Enhance Accessibility**:

- Ensure AA compliance using WebAIM Contrast Checker.
- Add alt text to images and ARIA labels to buttons.

Priority Matrix

Priority	Recommendation	Impact	Effort
High	Redesign homepage	High	Medium
High	Add trust signals	High	Low

High	Improve navigation	High	Medium
High	Optimize CTAs	High	Low
Medium	Refine content	Medium	Medium
Medium	Mobile optimization	Medium	High
Low	Enhance accessibility	Low	Low

Next Steps

1. **Week 1-2**: Redesign homepage and add trust signals.
2. **Week 3-4**: Improve navigation and optimize CTAs.
3. **Week 5-6**: Refine content and begin mobile optimization.
4. **Week 7-8**: Complete mobile optimization and enhance accessibility.

By following this roadmap, Shrreeji Sharan can significantly reduce user drop-offs and improve conversion rates.
